>> Introducing the Marplug™
Patented UK technology

Wipe Action

Goes Round Bends!

Our Range

The Marplug™ vanes act as individual wiping squeegees on the inside pipe surfaces removing virtually all material and leaving behind a visibly clean surface.

- Faster cleaning
- Recovering product reduces CIP pre-rinse, caustic load and rinse water volumes

- Goes around 90° bends as tight as 1.5D
- Easily passes over welds
- Negotiates flow plates
- Unaffected by minor variations in pipe diameter with 'real world' dents, seals etc
- Cost effectively addresses process wastage from batch production

Sizes to suit 1 1/2" to 8" Dairy and DIN 40 to 150. 3" Dairy may be our clients' most common size but Martec also can support any non-standard pipe size.

- Automated integral self-cleaning systems for ultimate hygienic cleanliness (CIP and SIP options)
